

making networks better

Our philosophy is simple:

When it comes to managing networks, we're...

Making Networks Better

whatever your need, wherever you are,
however we can.

The Company

In today's increasingly competitive business environment, efficient networking communications are the key to success in many organisations.

Networks Unlimited have focused on providing tangible results to our clients in the areas of network management, security and productivity solutions since our formation in 1992.

As an independent organisation, we have grown to become one of the UK's most successful, dynamic and innovative market leaders in this specialist field. Our client base comprises many of the most respected blue-chip companies in the UK.

Commitment to quality and service has always been our philosophy – providing quality management solutions and specialised services that deliver real business benefits to the user.

Our specialist skillsets and experience are in demand by companies with a need to improve their own network infrastructure and by those wishing to provide a better service to their customers.

Based in West Sussex, England, Networks Unlimited employ a team of dedicated, enthusiastic technical and sales professionals with extensive experience in managing networks. We continually strive to work in partnership with both our customers and suppliers with the ultimate goal of achieving results.

“ We had to find the 'right' solutions for our requirements to manage the Dun & Bradstreet network on a global basis.

Networks Unlimited provided us with leading edge management technology and consultancy to meet our goals and did so in a constructive and professional manner.

”

Struan MacDonald
Global LAN Systems
Technology Infrastructure
Global Technology Organisation
Dun & Bradstreet Corporation

“ I have used Networks Unlimited in two companies that I have worked for and have found the staff to be very helpful, and quick in getting information and prices to me on products.

Products are easily ordered and delivered promptly.”

Angus MacLeod
Network Manager
Pilkington Optronics

Network Products

For efficient management of today's networks, you need the right tools and systems, in the right place at the right time. In order to satisfy this goal, we have directed our focus toward network management and productivity solutions since inception.

The concept is proven...

Monitor ● Analyse ● Improve

In the complex and constantly changing world of data communications, it is essential to proactively monitor the operation of your networks, users and resources.

- Is the network operating efficiently?
- Are you at risk from internal or external security threats?
- Do you have the necessary tools to handle critical failure of your network or systems?
- Can you efficiently manage your network hardware and software inventory?
- Are you able to support users across your enterprise network as quickly and efficiently as you could yourself?
- Are you in control?

We provide solutions from baseline monitoring and diagnostic tools through to world class security, auditing, user support and network management systems. When we specify products, we recommend those with a proven reputation for quality which are specific to the task at hand. As an independent company, our recommendations are impartial and oriented to satisfying your requirements.

Key Product Areas

- SNMP & RMON management
- Remote control & help desks
- Virus protection
- Network inventory & audit
- PC, network, internet and intranet security
- Usage management
- LAN/WAN analysis tools
- Application monitoring

- File server management & back-up

“ Vital Network Services reputation depends on being able to solve problems with ease, efficiency and accuracy and that's why we entrusted Networks Unlimited to supply us with the best tools for the job. ”

Josh Ayres
Business Development Manager
Vital Network Services

Network Services

With even the best will in the world it is often impossible, due to limited resources, to proactively manage your network infrastructure as effectively as you would like.

Constantly evolving technological advances and oversubscribed IT support staff place enormous demands on today's IT and network managers. Our team of skilled professionals are on hand to assist you with every aspect of network operational assessment and improvement.

Most importantly, we are able to deliver services that are the envy of many other service providers – borne out by the fact that we act as specialist consultants to some of the most respected and major international organisations in the UK and overseas.

In order to ease the headaches, it is often simpler and more cost effective to call upon the services of a company whom you can trust. We have the necessary skillsets and expertise to act as additional resources, working in harmony with your existing IT support team.

Key Service Areas

- Trouble-shooting & network consultancy
- On-site health-check
- Remote network monitoring & support
- Internet security reviews & Firewall specification
- Product & technology training
- Internet & Year 2000 audits
- Hardware & software audits
- Network design & documentation
- Cabling certification & installation

“ Networks Unlimited were prepared to find the solution to fit our network security problem, rather than forcing the problem to fit any solution. ”

Stephen Harvey
International Education Services
TimePlex Group

Business Applications

We have worked with organisations from every sector of government, commerce and industry. Here are just a few examples...

Telecoms, FM and Systems Integration

In order for our clients to provide the necessary levels of service to their customers, support staff require the best quality network tools for the job. Networks Unlimited enable many companies to provide the best possible service to customers to remain competitive and meet budgetary constraints.

Banking and Finance

Any organisation involved in processing funds needs to have stringent security policies in place. It is crucial to ensure that the IT security solutions are the most up-to-date available. We pride ourselves on being at the forefront of IT network technology - ensuring that you have the solutions to always keep you one step ahead of data crime. We provide world-class products - installed, working and protecting.

Health and Education

Network Unlimited recognise that investment needs to be carefully considered by these organisations. We have worked with countless hospitals, trusts, schools, colleges and universities to ensure that they still have access to the best products without being tied to a single vendor – a situation that can often incur excess or unnecessary expenditure. Our team of professional consultants are available as and when required, reducing the workload on your full-time IT support staff.

Key Market Sectors

- IT & networking industry
- Banking & finances
- Health & education
- Local & central government
- Insurance
- Retail & manufacturing
- Travel & leisure
- Chemicals & pharmaceutical
- Publishing & media
- Transport & utilities
- Legal & professional

Geography

- UK & Ireland
- Europe
- Africa & Middle East
- Asia - Pacific
- Rest of world

“We needed greater network visibility – Networks Unlimited were able to provide the systems and services to meet that challenge.”

Howard Puddy
IT Services Manager
East Hampshire District Council

Service, Quality & Commitment

Service

We strive to ensure that our customers are totally satisfied with the service that they receive – from the very first contact with the company to after-sales support and backup. In order to achieve this, many systems are in place to facilitate...

- Prompt despatch of relevant information
- Minimal purchasing bureaucracy
- Fast & efficient product delivery
- Easy support access

Quality

We aim to differentiate ourselves by delivering quality, specialist products and services.

- Best products within the range
- Specialist & friendly advice
- Skilled & trained technical & sales staff

Commitment

To ensure product and services satisfaction, we are committed to continually improving the way in which we respond to customer feedback. Wherever applicable, this is monitored, analysed and recommendations acted upon to give...

- Customer satisfaction
- Support without compromise
- Strengthened business relationships
