

## Mutiny – THE Simple Network Monitoring Platform

Brought to you by:

Mutiny network performance tools help mitigate operational and financial risk to your business and optimise IT efficiency. It monitors critical systems on the network and sends alerts to the network operations team.

Mutiny is available either as a standard appliance, small business monitor or virtual solution through VMware, with a selection of add-on modules to further enhance the core product.

Mutiny offers sophisticated visibility and reporting on IT assets without the cost or complexity of alternative products on the market.

### Easy To Use

Designed with ease-of-use in mind and customisable views that provide controlled access to network data.

### Cost Effective

Licensed on a per monitored-device basis with flexible licencing schemes.

### Scalable And Customisable

Suitable for the unique infrastructure of organisations of all sizes, Mutiny is capable of polling over 2,000 devices per minute. It can be deployed for customers' own-branded products through to the monitoring needs of IT Managed Service providers.

### APPLIANCE FEATURES

Ready to go Mutiny appliance. Just configure the IP address for your network using the simple console and web on, add a Node Licence and begin to discover your network.

### SMALL FORM FACTOR

If you're tight for space or wish to deploy a DR unit why not consider our new next unit of monitoring appliance based on the Intel® NUC.

This surprisingly powerful appliance packs a big punch with an Intel i5 processor 4GB of RAM and a 480 GB solid state drive.

### VMWARE IMAGE

For users wishing to virtualise, Mutiny is available as a virtual machine.
